Krzysztof Kopeć

Summary

Work History

- present

Accenture Applied Intelligence
Data Science Analyst

I have been improving a telecommunication system by adding new functions and infrastructure, such as the triggers responsible for sending SMS messages. I have presented the progress on a live demo for the client after each sprint. I operated on Oracle databases working closely with the QA team as well as performing tests individually.

2020-03 - 2021-07

Accenture
Intern

A year-long internship in an international project supporting a team of analysts using SAS software. Programming components for user interface in React language. Working with Oracle database.

2018-08 - 2019-02

Institute of Nuclear Chemistry and Technology
Helpdesk Support Technician

Direct and remote support of users in their daily work on workstations.
Hardware and software management.
Installation and configuration of workstations and other IT equipment.

Education

2016-09 - 2021-09

Polish-Japanese Academy of Information Technology

IT. Specialization: Databases
